## PROJECTS

**Chat-Application** 🔗  
2023 – 2023
- Integrated Socket.io with backend technologies such as **Node.js** to create a scalable and efficient chat server.
- Utilized **Socket.io** event-based communication model to handle message sending and receiving in real-time.
- Collaborated with designers to translate UI/UX mockups into functional and visually appealing chat interfaces using **Tailwind CSS**.

**Matrimony-site** 🔗  
2023 – 2023
- Implemented robust user authentication and authorization systems to ensure the **security and privacy of user information.**
- Designed and implemented a comprehensive profile management system, allowing users to update their personal details, preferences, and partner preferences effortlessly.

**E-Commerce** 🔗  
2023 – 2023
- Managed e-commerce administration panel, optimizing product management processes and enhancing user experience.
- Implemented streamlined product addition methods and developed an intuitive interface for smooth browsing and secure transactions **with Razorpay** integration.
